

Drag. Drop. Deliver.

(E-learning made easy!)

Online delivery of training and presentations is just a click away with award-winning Impatica for PowerPoint.

PowerPoint is an ideal tool for creating dynamic content and rich presentations to educate, train and inform viewers. Unfortunately, large file sizes, the inability for viewers to display rich media elements without specific plug-ins, and bandwidth limitations have made the smooth delivery of these files over the Internet virtually impossible.

Enter Impatica for PowerPoint.

With Impatica for PowerPoint, educators, subject matter experts, and business professionals are now able to create engaging, media rich online content quickly and easily. With a reduction of 90-95% in file size and an award winning "impaticized" presentation format which runs independently of operating systems or specific software, Impatica overcomes the need for viewers to install plug-ins, wait for large downloads or deal with incorrect font displays and missing rich media elements. And, since all it takes is a simple drag and drop action to deliver your impaticized presentation online, by e-mail, or within a learning management system, Impatica for PowerPoint also saves you time and money.

**Drag. Drop. Deliver.
E-learning made easy!**

How it Works

Impatica for PowerPoint is easy to learn and use. Launch the Impatica program and select the PowerPoint file you want to impaticize. In seconds, it will create a corresponding Impatica file, and you're ready to go. Without hassle or additional software, deliver your Impatica presentations to a web site, learning management system or by e-mail. Impatica for PowerPoint identifies each element on each PowerPoint slide, including audio segments and animation effects, and converts them into a compact format. When the presentation is accessed from a web page, a small Java applet automatically streams the content and dynamically shows the narrated, animated presentation.

"Software, software, software. Teachers and students ask, 'Do I need it? Can I afford it? Will I use it?' With Impatica for PowerPoint, the answer is Yes, Yes, Yes. In minutes your PowerPoint presentation can be delivered by e-mail to an individual or by Internet to a class or classes. And Impatica for PowerPoint works flawlessly with [learning management systems]."
