

# impatica OnCue

Engage.  
Inform.  
Inspire.

## Now anyone can synchronize video with PowerPoint™ for easy Internet delivery using Impatica OnCue.

Delivering effective online communications quickly and easily is a fundamental necessity for educators, trainers, and presentation specialists. Impatica OnCue meets this need by providing a simple solution for the production and delivery of synchronized video and PowerPoint presentations combined with searchable text, dynamic indexing and navigation.

Impatica OnCue enables you to focus on your message, knowing that you will reach your entire audience with one solution. The playback is hassle-free, so the audience doesn't need to install any plug-ins or applications to receive the message. In fact, viewers don't even need a high-speed Internet connection. And, content creation is kept simple, so anyone can create engaging presentations quickly, maximizing and accelerating your return on investment.

Perfectly synchronizing video, audio and impaticized PowerPoint slides is as easy as playing your slide show. No scripting or programming is required. With the click of a button you can place slide, animation and paragraph cue points. In moments your dynamic, platform independent, compact presentation is ready for playback over the Internet through a web page, e-mail or Learning Management System.

## Hassle-free production. Hassle-free delivery.

It's really that easy to communicate with impact!

## How it Works

In a nutshell, Impatica OnCue allows you to synchronize your video and/or audio, *impaticized* PowerPoint presentation and narrative text, then produces a set of compact files to upload for Internet delivery. The software automatically generates and uploads web pages for the content and creates e-mail HTML.

When the presentation is accessed from a web page, a small Java applet automatically streams and synchronizes the video and animated presentation. Additionally, it responds to user navigation requests and tracks progress. SCORM™ compliance provides tracking information, including bookmarks for re-entry.

## Product Features

Impatica OnCue includes a full Impatica for PowerPoint license that impaticizes PowerPoint presentations for plug-in free delivery over the Internet, from your web site and through e-mail. See the Impatica for PowerPoint product literature or visit [www.impatica.com](http://www.impatica.com) for details.

### In addition, Impatica OnCue features:

- Plug-in free video
