

“I'm free!”
Break free from your laptop!

NEW!
Project your
BlackBerry
screen

Project engaging PowerPoint™ presentations directly from your handheld with Impatica ShowMate.

Always have PowerPoint in the palm of your hand.

Impatica ShowMate is the most powerful presentation tool you'll ever own. Compact, lightweight and easy to use, the revolutionary ShowMate enables you to connect your handheld device to a projector and present compelling PowerPoint presentations wherever you go.

Engage your audience with the same dynamic presentations once only possible from your computer. Your ShowMate will deliver the full impact of your graphics, animations and slide transition effects. And it's so small and light you'll never leave it behind.

After all, who wants to be tethered to a laptop forever?

How it Works

Impatica ShowMate enables users to project:

- PowerPoint presentations from BlackBerry, Palm, Sony Ericsson and Windows Mobile;
- Screen contents from BlackBerry smartphones with BlackBerry OS 4.3 or later.

Users simply connect the ShowMate to a projector and wirelessly to their handheld, and are then ready to present.

To get a PowerPoint show started, users open a presentation that they have already saved to the handheld. The PowerPoint slides are displayed on the projector screen. Text, graphics, charts, graphs and even advanced animations and transition effects are shown in full fidelity. The handheld becomes an easy-to-use remote, allowing the user to navigate through the presentation while viewing a slide list, text or notes.

To project the BlackBerry screen, users simply start projecting and then use the BlackBerry as they normally would. The BlackBerry screen is displayed in real time on the connected display.

Product Features

Impatica ShowMate is a simple, compact device that makes presenting to your audience easy.

Easy to use:

- Features plug-and-present simplicity
- Displays all PowerPoint slide attributes including animation and transition effects
- Uses handheld as a remote control
- Shows presentation notes, slide titles and text on the handheld
